WOOD ACQUISITION PLAN PROGRAM

Summary

The Wood Acquisition Program (W.A.P.) required by the Forest Sustainability Regulations completed the third year of operation in 2002. All Registered Buyers that acquired greater than 5,000 m^3 from privately owned forest lands in Nova Scotia during the 2002 calendar year were required to submit a Wood Acquisition Plan for that volume in 2002. All compliant Registered Buyers opted for undertaking a silviculture program for the year 2002, and submitted a summary of completed silviculture (Form D, Part III) for claim in 2002 along with supporting silviculture site location details.

The volumes from 2002 that required a Wood Acquistion Plan totaled 5.278 million cubic metres (Table 1). From those volumes, a total of 14.061 million silviculture credit value was required in year 2002, and the summary reports indicated that 18.225 million silviculture credits were claimed, which included 16.413 million silviculture credits and 1.812 million administrative credits (Table 1). In comparison to year 2001, required silviculture credit increased by 41% and completed silviculture claimed increased by 36% in 2002. Industrial silviculture credits exceeded credits required in 2002 (Table 1) by 3.4 million. Private silviculture credit value claimed exceeded credits required by 806,061 and completed hardwood silviculture on both Industrial and Private landowners exceeded credit value required (Table 1).

A total of 38,408 hectares of silviculture for a credit value of 16.413 million were claimed in 2002 (Table 2). Established Plantation (Category 2), recorded the most area claimed at 24% which accounted for 36% of total credit value (Table 2). Early Competition Control (Category 3), also recorded 24% in area but accounted for only 17 percent of total credit value claimed in 2002 (Table 2). Categories 1 to 5 (except Categories 1a and 1b) each had at least 10% of claimed area, and only Categories 1b, 6 and 7 each contributed less than 1% of total area claimed in 2002 (Table 2). Category 1a contributed 6%. Softwood silviculture completed on all lands was 97 percent of the total credit value claimed in year 2002 (Table 3).

A breakdown of completed silviculture by category and ownership is described in Table 4. Private silviculture value claimed in the Wood Acquisition Plans for 2002 totaled 8.4 million credits (Table 4). An additional 0.50 million dollars of silviculture was completed on private woodlots through the silviculture program operated by the Association of Sustainable Forestry with DNR silviculture funding in year 2002. Total private woodlot silviculture value completed in 2002 was 8.9 million. Industrial silviculture claimed through Wood Acquisition Plans for year 2002 totaled 8.1 million credits (Table 4).

A summary of completed silviculture area claimed in year 2002 by silviculture category, ownership and species type is included in Table 5.

TABLE 1. SUMMARY OF WOOD ACQUISITION PLAN REQUIREMENTS AND SILVICULTURAL COMPLETIONS BY TENURE - 2002
